**REMOVING CARBON**

**RESTORING FORESTS**

## FROM THE CHAIRMAN

2013 was a year which saw substantial changes for Greenfleet: change in the external policy environment, change in our leadership team, and change in our approach to delivering our primary purpose – beautiful biodiverse native forests sequestering carbon.

**In the external policy environment, we saw an extensive national debate around how to achieve reductions in Australia's greenhouse gas emissions.** This debate is ongoing, and has unfortunately led to a high level of uncertainty in terms of investment in CO<sub>2</sub>-e reductions. It is a great testament to the awareness, drive and common sense of Greenfleet's individual and corporate donors that they continue, year in and year out, to make a real commitment to the future by offsetting with us. Overall, in 2013 we sold more than 160,000 tonnes of offsets to over 320 organisations and 38,000 individuals\* Australia-wide

At the same time we saw a change at the top of our management team. Sara Gipton ended her tenure as CEO, having made an exceptional contribution to Greenfleet over eight years – years that saw the organisation grow and develop as a highly professional organisation, able to satisfy the needs and demands of future carbon markets with confidence. I deeply thank Sara for her time at Greenfleet; it was a pleasure working with her.

New CEO, Wayne Wescott, brings energy, exuberance and a long and professional history in the environmental not-for-profit sector. Greenfleet is in good hands.

In another change, Greenfleet made its first land purchase – 'Avoca' near West Wyalong in NSW. This allows us to manage our own forested land for the first time. We will continue to plant in a variety of manners and across various land tenures; however this is an important step forward for Greenfleet. In 2013, Greenfleet planted over 960,000 native trees.

With all of this change, Greenfleet still delivered a financial surplus and we are prosperous and growing with a turnover of almost \$2.5M. While we are and will remain a not-for-profit organisation, with a focus on the environment for Australia's community, a surplus keeps us strong and able to invest.

I would like to thank my fellow Directors and the Greenfleet management team and staff, as well as all of our supporters, for delivering such a successful year.

Ian Porter | Greenfleet Chairman

## FROM THE CEO

By the end of 2013, Greenfleet has re-energised its vision and re-focused its approach. Last year we deepened our engagement with a variety of supporters, who have been with us (in many cases) for a long time.

**These range from individuals offsetting their own vehicles through to large corporations that are offsetting their whole fleet.** We intend to do more of the community and planting days as well as corporate speaker sessions that we enjoyed last year. We also plan to work more closely with supporters, suppliers, staff and contractors who also share our approach to practical climate action.

Last year we also bought our own property, and this signals a new long-term approach to our land supply. We have been working hard to build a land supply pipeline through the rest of the decade, in order to ensure that we protect our forests, maximise the carbon benefits that their growth creates and ensure a diverse geographical spread to manage all relevant risks.

These approaches are wrapped up in a three year strategy that the Board adopted at the end of 2013. This strategy grows our revenue base, builds the land pipeline, broadens the support channels (such as our Business Advisory Council), deepens our engagement with landholders, provides for more events and outward involvement in our sector (by expanding formal partnerships with other organisations), develops some innovative approaches to our offset model and working with our forests, and – in short – provides a practical approach to climate action in the middle of a particularly difficult time for climate change policy in this country.

As I joined the organisation in the last quarter of the year, I am grateful to the excellent work that has preceded me. I am also keen for Greenfleet supporters, landholders, stakeholders and others to contact me with their views on how we can increase our impact. Please feel free to call me on 0419 521 272 direct.

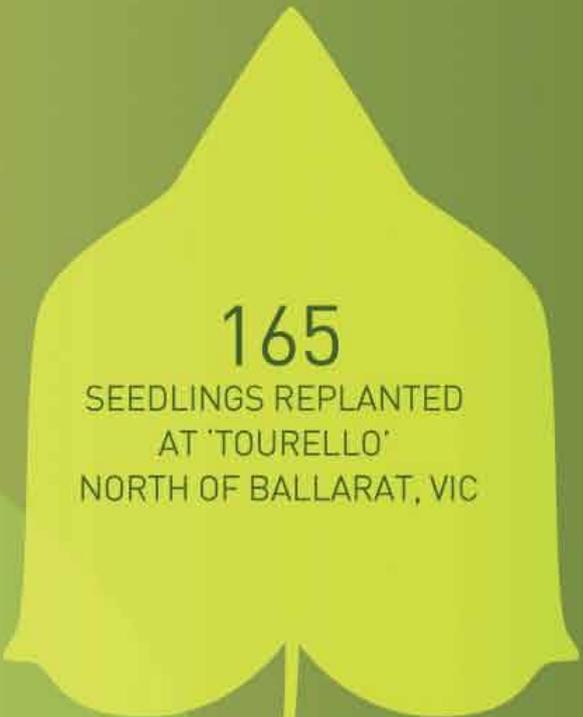

Warm regards,

Wayne Wescott | Greenfleet CEO

## 'AVOCA' – GREENFLEET'S FIRST OWNED PROPERTY

Greenfleet took a new step in 2013 by purchasing our first property - 'Avoca' in Central West NSW, within the traditional country of the Wiradjuri people.

Prior to purchase by Greenfleet in March 2013, most of the property was used for cropping (mostly wheat and canola) and sheep production with around 500 hectares of less productive soils left as remnant vegetation.

The surrounding region has been extensively cleared for cropping and grazing which left the remaining native vegetation in a highly fragmented state. The property borders the Buddigower State Forest which is to become part of the nearby Buddigower Nature Reserve, an area of significance for its biological diversity values and home to the endangered Malleefowl, Shy Heathwren and Southern Scrub-robin.

One of the objectives of our biodiverse reforestation project on this property is to create much needed landscape connectivity and enhance conservation values. As it grows, our native forest will provide habitat to threatened birdlife such as that found on the neighbouring reserve, and for endangered migrating species such as the Swift Parrot.

Great efforts have been put into preparing the site for planting, including an extensive weed management program, internal fence removal (which will also assist wildlife traffic through the property) and refinements in seeding machine technology.

The majority of seed established was sourced from within the district. More than 600 kg of seed was required, comprised of 43 distinct species indigenous to the area. Seed collection was carried out over a number of months to coincide with the various seeding times of the plants.

In winter 2013, three months after purchase, 900 ha of the 1,700 ha property were sown with locally native seeds in rows around four metres apart along contour lines. Put end-on-end the seeded lines are 2,200km long - that's longer than traveling from Adelaide to Brisbane! Early results were very promising with seedlings observed as little as two months after seeding.

The remaining 800 ha of the property is left undisturbed with 180 ha left for natural regeneration and 620 ha of remnant native bushland.

'Avoca' will extend the biological values of the Buddigower Nature Reserve adding a further 1,700 ha of protected habitat through restoration of the pre-clearing vegetation communities.

## PROTECTING THREATENED SPECIES TO CONSERVE THE AUSTRALIAN BIODIVERSITY

In 2013, we planted 65 specimens of the Hairy Anchor Plant as part of an in-fill planting at 'Tourello', one of our sites, 25 km north of Ballarat, VIC.

**The Hairy Anchor Plant (*Discaria pubescens*) is an extremely rare species already extinct in Queensland and threatened in Victoria.** Managed by Parks Victoria, this site and a neighbouring private property are among the few areas where remnant individuals still survive.

The species formerly had a widespread distribution in all the eastern Australian states. It has not been recorded from Queensland since 1898 (Willis 1955) and is considered endangered in Tasmania (Coates 1991). In Victoria, the species is now restricted to small fragmented populations in the eastern highlands and to the west of Melbourne (Willis 1972, Beaglehole 1980)\*.

## NEW INSECT SPECIES DISCOVERED IN A GREENFLEET FOREST

Researchers from the Department of Zoology at La Trobe University, led by Dr Martin Steinbauer, have uncovered a new insect species in the Greenfleet forest 'Battery Creek' near Fish Creek, VIC.

**The team of scientists visited the site to survey psyllids (tiny little cicada-like insects), and discovered a new species** feeding on juvenile leaves of Bog Gum (*Eucalyptus kitsoniana*). As of February 2013, the Bog Gum Psyllid (or scientific name *Ctenarytaina bipartita*) became officially "known to science".

Insects are not only the most species-rich group on Earth, they also play numerous crucial roles in ecosystem functioning and the global economy. The conservation of insect diversity is therefore a topic of global importance\*\*. This discovery is very encouraging and demonstrates the vital part our biodiverse reforestation projects play in the balance of the natural world.

A partnership with La Trobe University was launched in November 2013 to further study insect biodiversity in Greenfleet's biodiverse native forests.

## GREENFLEET PROJECTS REGISTERED UNDER THE FEDERAL GOVERNMENT'S CFI

In 2013, Greenfleet was the first organisation to have multiple reforestation projects registered under the Clean Energy Regulator's Carbon Farming Initiative (CFI).

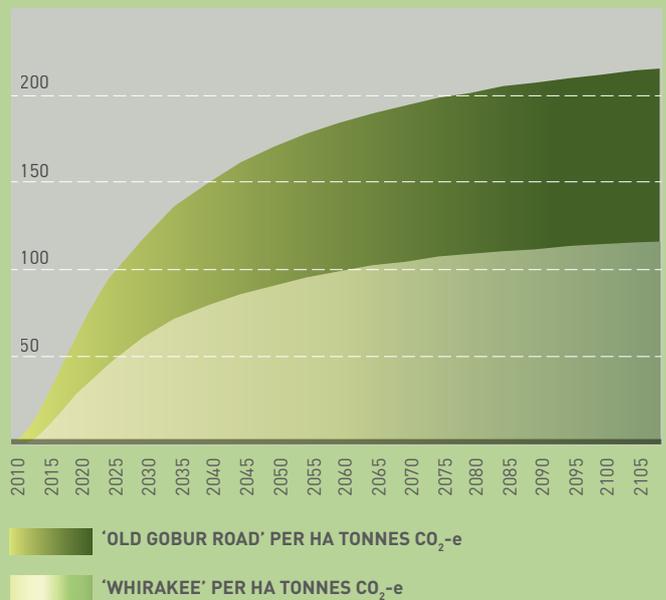

Being registered by the Federal Government's Clean Energy Regulator means that these two projects demonstrate that they meet all conditions and eligibility criteria set out in the relevant methodology determination and other CFI legislation. This gives assurance that the carbon sequestered in our native forests is verifiable.

The first site, 'Old Gobur Road' is located near Merton in Northeast Victoria and covers 7 ha, and the other, 'Whirrakee', is located near the Mt Korong Nature Conservation Reserve, just east of Wedderburn in the Victorian Central Goldfields and covers 52 ha.

'Whirrakee' is part of a greater native reforestation plan in the region creating vital connections between remnant native bushland. To date, Greenfleet has revegetated almost 1,000 ha across four large properties in the area with further plantings planned for 2014.

The methodology of determination used is the CFI's "Sequestration Methodology: Quantifying Carbon Sequestration by Permanent Environmental Plantings of Native Species using the CFI Reforestation Modelling Tool". The graph below shows the expected CO<sub>2</sub>-e capture per hectare according to the CFI Reforestation Modelling Tool (RMT) for the coming 100 years.

**TONNES CO<sub>2</sub>-e SEQUESTRATION PER HECTARE ACCORDING TO CFI's RMIT**

## GREENFLEET & LANDHOLDERS – GROWING STRONGER, TOGETHER

We recognise the value of the land that property owners make available for native, biodiverse reforestation projects. Greenfleet works with a diverse array of landholders; ranging from private owners to commercial farms and from local councils to crown land managers. We would like to thank and acknowledge the 340+ landholders with whom we're working with.

Together we're returning land to its natural state and protecting biodiversity in various urban and rural areas. Here is what some landholders had to say about their partnership with Greenfleet:

"Working with Greenfleet, we were able to gain the help we needed to finance the preparation, planting and purchasing the mix of species that was right for our area, and we were able to use local contractors to support our community. Greenfleet was very flexible, understood what we wanted to achieve with the plantings, and worked with us to get a great outcome.

"Parts of the farm were suffering from quite serious erosion – and we've been able to introduce trees to control this.

"We've also been able to create pockets of biodiversity that have attracted birds and insects. The range of birds on the property has expanded significantly, and we're finding pests are less of a problem for us than they are in farms with broad acre monoculture."

Dr Richard Di Natale, owners of 'Twin Gums', a 50-acre farm at the foothills of Victoria's Otway Range

"We purchased 20 acres of overgrazed dairy farmland. When I first arrived, there were two trees on 20 acres. We had 15 acres on the floodplain that we weren't quite sure what to do with, so I asked Greenfleet to work with us."

"With their assistance we planted over 5,500 trees on our property. By partnering with Greenfleet, the carbon agreement on title guarantees these trees are around long after I'm gone."

Dot Moller, owner of 'Long Flat', a 20-acre farm near Lismore, NSW.

"We now have one of the best farms in Victoria, but probably the biggest gain has been the personal satisfaction of doing the right thing for future generations.

"One of the best things we've done for our farm is plant trees. We're a family run farm and we couldn't afford to do the planting ourselves, but with the help of Greenfleet, we've invested in the land in a way that will pay us back for decades to come."

Toby Liston, co-owner of 'Three Bridges' a farm which breeds some of the nation's most prized thoroughbreds in Central Victoria.

## MIGHTY FUNDRAISER EFFORTS

---

We are amazed by the time and energy that our fundraisers invest in support of Greenfleet and the environment.

We would like to say a big thankyou to the adventurers and big-hearted supporters of our cause who organised events or achieved incredible challenges in 2013 to raise funds for Greenfleet and help restore Australian native forests.

Nick Scaife, Tommy Gurr, Jimmy McGee and Markus Schorn who cycled 17,500km around Australia in just 8 months and raised \$5,200+

Students and staff at Newton High School of Performing Arts who raised \$3,300 at their annual Earth Festival

Amber Johnston-Billings who ran the Chevron City2Surf and raised funds for Greenfleet

Chris Hayward who is attempting the ascent of the Mighty Murray by kayaking unassisted from sea to source

## GREENFLEET RECOGNISED FOR COMMUNITY PARTNERSHIP

---

Cardinia Creek Revegetation Project won the Environmental Sustainability Projects award at the Corrections Victoria – Community Partnership Awards ceremony in November 2013.

Greenfleet have been working with Parks Victoria to restore the native forest for the future of the new Cardinia Creek Parklands in Berwick, Victoria. This revegetation project was made possible thanks to the amazing partnership with Parks Victoria and the Victoria Department of Justice and a financial grant from the Lord Mayor's Charitable Fund.

The community has been very much involved with this project in conjunction with Community Correctional Services and Homes Glen TAFE. Part of this involvement was providing low risk offenders the opportunity to serve community based orders in a positive environment by assisting in the planting of trees.

## BOARD OF DIRECTORS 2013

The Greenfleet Board is drawn from a wide variety of academic and commercial backgrounds. This broad experience helps ensure Greenfleet is well positioned in the carbon marketplace and can continue to offer solutions to individuals and businesses throughout Australia.

### MR IAN PORTER (CHAIRMAN)

Senior Consultant at The Nous Group

### MS SAMANTHA BRIGNELL (FROM 16 APRIL 2013)

General Manager of Sales Operations at Telstra

### MR JACK HOLDEN

Sustainability Manager for Fonterra's APMEA region; Treasurer – Sustainable Agriculture Initiative – Australia; Member of the Sustainability Committee of the Australia Food & Grocery Council; Banksia Award finalist in 2006 for the "CarbonTender" carbon sinks project; Director of MJJ Agriculture

### MR GUNTHER JURKSCHAT

General Manager at Victorian Automobile Chamber of Commerce; Member of the Australian Institute of Company Directors (GAICD); Director of the Automotive Alternative Fuels Registration Board; Member of the Australian Refrigeration Council

### MR VISHAAL KISHORE (TO 14 OCTOBER 2013)

Director, Office of the Secretary at Department of Health

### MR DAVID LAMB

David Lamb worked with Ford Motor Company in Australia and around the world before joining CSIRO. He was responsible for the CSIRO Low Emission Hybrid car, and the Holden ECommodore project between CSIRO and Holden, show at the 2000 Olympics.

### MR BLAIR LINDSAY

Group HR Manager at the PCI Group; Non-Executive Director of the Alternative Technology Association; Member of the Australian Institute of Company Directors (GAICD)

### HON. THOMAS ROPER

Project Director of the Global Sustainable Energy Islands Initiative; Observer in the Renewable Energy and Energy Efficiency Partnership (REEEP) SE Asia and Pacific Advisory Committee; Chair of the Australian Sustainable Built Environment Council; Chair of the NABERS (National Australian Built Environment Rating System) Stakeholders Advisory Committee

### MR PHIL THOMAS (COMPANY SECRETARY)

Principal of Oakland Group Pty Ltd

## BUSINESS ADVISORY COUNCIL 2013

Our team is also assisted by a Business Advisory Council – a group of executives from a range of industries, helping to promote the Greenfleet program and ethos throughout their industries.

### MR ROGER PERRY (CHAIRMAN)

Managing Director at Bevington Group; Chair of the World Vision Business Advisory Councils

### MS YVONNE BRUCE

General Manager Global Operations, Wholesale Banking at NAB

### MR GREG CANN

Company Director at Bottlecyclers Pty Ltd; Company Director at mecu Ltd (trading as bankmecu); Deputy Chairman at iSelect Ltd; Company Director at Yarra Valley Water; Trustee of the Australian Cancer Research Foundation

### MR GORDON DAVIS

Chair of the VicForests Board; Non-Executive Director of Nufarm Limited; Director of The Nature Conservancy

### MS JOAN FITZPATRICK

Executive director with the Bevington Group; Director of the Victorian Managed Insurance Authority (VMIA); Chair of the federal governments' Australian Reinsurance Pool Corporation; Director & Deputy Chair of the CREATE Foundation; Member of the World Vision Business Advisory Council

### MR PHILIP GENTRY

Chief Financial Officer of Grocon; Director at CIBUS Group; Director at Hassad Australia

### MR WARREN HUTCHEON

CEO of the Victorian Managed Insurance Authority (VMIA)

### MR STEWART MOORE

CEO of Earthcheck Pty Ltd trading as EC3Global; Fellow of the Financial Services Institute of Australia and the Australian Tourism Research Institute;

### DR BRENDAN MURPHY

Chief Executive Officer of Austin Health; Professorial Fellow with the title of Professor at Melbourne University;

### MR GREG RIDDER

Director at the Australian Centre for Posttraumatic Mental Health Inc; Director at Tibaldi (Australasia) Pty Ltd; Member of the Business Advisory Council of World Vision Australia

### MS JUDITH SWALES

Managing Director of Fonterra Australia; Non-Executive Director at Dulux Group

### MR RICK WOODS

General Manager, Fibre Packaging at Orora Ltd; Director of Food Bank

## SUPPORTER ACKNOWLEDGMENT

---

As a not-for-profit organisation, Greenfleet is grateful for the support of these organisations which provide part or full pro bono services or products.

### **AMBIUS**

Provision of indoor office plants.

### **BAKER & MCKENZIE**

Pro bono legal advice relating to carbon. We also seek assistance on specific issues on a fee for service basis. Provision of a venue for a Greenfleet event in Melbourne.

### **BEVINGTON GROUP**

Hosting of the Greenfleet Business Advisory Council meetings.

### **EUROPCAR**

Provision of hire vehicles at no cost to Greenfleet staff when interstate.

### **FISHPRINT**

Newsletter printing at no cost.

### **FREEHILLS**

Pro bono governance advice and assistance. We also seek assistance on specific issues on a fee for service basis.

### **LEASEPLAN**

Provision of two vehicles for Greenfleet usage: a Prius Eco Friendly city/urban vehicle and a 4WD vehicle for our Forestry team.

### **PITCHER PARTNERS**

Fee for service auditing at not-for-profit rates. Pro bono advice on taxation matters and financial modelling. Complimentary attendance to AICD events and technical industry seminars hosted by Pitcher Partners.

### **SALESFORCE FOUNDATION**

Pro bono provision of 10 software licences for our Customer Relationship Management System.

### **WILSON PARKING**

Provision of secure vehicle parking at no cost.

### **WORKGROUP COMPUTER SOLUTIONS**

Contracted IT support services at not-for-profit rates and provision of pro bono IT support and advice.

### **YOUTUBE & ANIMOTO**

Free pro accounts and features.

## SUPPORTER ACKNOWLEDGMENT

---

We would like to acknowledge and give a special thankyou to the organisations which have been continuously offsetting emissions with Greenfleet every year for over 10 years.

## GREENFLEET 2013 GREENHOUSE GAS EMISSIONS INVENTORY

This annual assessment of Greenfleet's greenhouse gas emissions was undertaken against EarthCheck Assessed HealthCheck and EarthCheck benchmarking indicators for independent assessment and verification.

DIRECT EMISSIONS (SCOPE 1)		TOTAL EMISSIONS ESTIMATE TONNES CO <sub>2</sub> -e
Diesel	18.3	
Unleaded Petrol	1.1	Forest Operations
INDIRECT EMISSIONS (SCOPE 2)		
Electricity	21.2	Collins Street HQ and remote offices
INDIRECT EMISSIONS (SCOPE 3)		
Flights	6.6	Total climate change impact
Waste	5.0	Organic waste to landfill
Paper consumption	0.6	
TOTAL EMISSIONS		AS ASSESSED BY EARTHCHECK
Offsets	-144.1	Future offsets via Greenfleet's native forestry program
NET EMISSIONS		0

By including Scope 3 lifecycle emissions of fuel used, applying maximum warming potential factors for flights taken and including estimated emissions from seedling propagation, site preparation and contractors' travel, Greenfleet's calculation determined an emissions' figure higher than that measured by EarthCheck. Greenfleet has decided to use this figure as a basis to offset our carbon emissions to ensure that our environmental impact is fully negated.

By offsetting more than the assessed amount of tonnes of greenhouse gases, Greenfleet hopes to have a net positive impact on our shared global environment.

## GREENFLEET 2012 & 2013 FINANCIALS

Greenfleet's financial year operates from 1 January to 31 December each year. The following information summarises financial performance for 2013. Greenfleet's Financial Reports have been audited by Pitcher Partners

INCOME	2013 \$	2012 \$
Program revenue	2,419,151	2,656,504
Other revenue	48,529	159,287
<b>Total revenue</b>	<b>2,467,680</b>	<b>2,815,791</b>

EXPENSES		
Program expenses	688,413	1,587,889
Administration expenses	705,900	459,608
Marketing expenses	280,465	540,076
Occupancy expenses	134,178	112,080
Other expenses	143,326	163,949
<b>Total expenses</b>	<b>1,952,282</b>	<b>2,863,602</b>
<b>OPERATING SURPLUS/ (DEFICIT)</b>	<b>515,398</b>	<b>(47,811)</b>

FINANCIAL POSITION (AS AT 31 DECEMBER 2013)		
Tree provisions (liability)	1,083,595	1,537,549
<b>Total cash balance</b>	<b>1,860,673</b>	<b>2,631,224</b>

FUNDRAISING SUMMARY	\$	%	\$	%
Total costs of fundraising	524,954	22	427,408	16
Gross income from fundraising	2,409,420		2,687,213	

Some income and expense items have been re-categorised in 2013. These re-categorisations have been applied to the 2012 figures for consistency. Total revenue and total expenses for 2012 remain unchanged.
